

## HADE document pouches

Document pouches take care that the receiver keeps the overview – documents, delivery notes and invoices arrive safely with the goods. Document pouches are resistant against wind and weather, stick on nearly all surfaces and spare the additional labelling of goods.

### Formate

The document pouches are available in boxes with 1000 pieces each. Alternatively they are packed in 4 units (250 pieces each) in one practical box.

The bags consist of hot welded polyäthylen of low density.

- front side transparent or pre-printed
- rear side white or transparent
- removable layer silicon coated
- adhesive made of thermo-plastic rubber or acrylic resin (water-based)
